

electronic manuscript questionnaire

CAMBRIDGE
UNIVERSITY PRESS

general

Author: Barry Mazur and William Stein

Title: Prime Numbers and the Riemann Hypothesis

Date: March 13, 2015

computer/software

Computer Operating System (e.g. Macintosh OS X, Microsoft Windows XP): Linux

Software including version number (e.g. Microsoft Word 2000, Word XP, LaTeX 2e): LaTeX 3.14159265-2.6-1.40.15 (TeX Live 2014/Debian)

Peripheral packages (e.g. BibTeX, Formulator, MacEquation): BibTeX

Compression software, if any (e.g. StuffIt, Zip, gzip):

media

Provided on: <https://github.com/williamstein/rh>

Formatted for: PC Mac LINUX Other (explain):

graphics

Number of graphics provided as electronic files: 181

Were the files: scanned [[electronically originated]]

File format: TIFF EPS Other (explain): pdf and png and jpg

Resolution: it depends on the file

Software used to create files, including version number: I primarily used <http://sagemath.org>, most recently version 6.5.

text

Does the text contain: – any technical notation, foreign accents, or other special characters (explain):

 -→ yes, but done properly via latex (not Unicode)

 – an Index – if working in Word it is recommended that you create your index using the built-in Word index tool prior to submission

 -→ no

Has your text been: spell-checked, grammar-checked, or other special checking (explain):

 -→ I don't understand this question. Do you mean "did I use the built in spell checker/grammar checking in Microsoft Word?" If so, no, since I didn't use word. Do you mean, "did you check your own spelling and grammar?" If so, of course we do. What is "special checking"?

If it is possible for your book, would you prefer copyediting and review to proceed electronically?

→ YES

IMPORTANT

THE HARDCOPY MUST DERIVE FROM THE ELECTRONIC FILES SUPPLIED. PRODUCTION PROCEEDS FROM THE FILES AND THE HARDCOPY IS USED ONLY FOR CONFIRMATION.
