February 10, 2017

1 View First Course Handout

Welcome to SMC testing Step 2. At this point, you have a login and have been added to the online roster for the course. The purpose of this second step is to ensure that you can see the project for the course, view a sample handout, and enter some comments on the process so far.

Please login again at <https://cloud.sagemath.com>. After login, you will be taken to the project list. The list is no longer empty. You should see an entry for the class project, ending with 2017-Q1/SMC-01, as shown below.

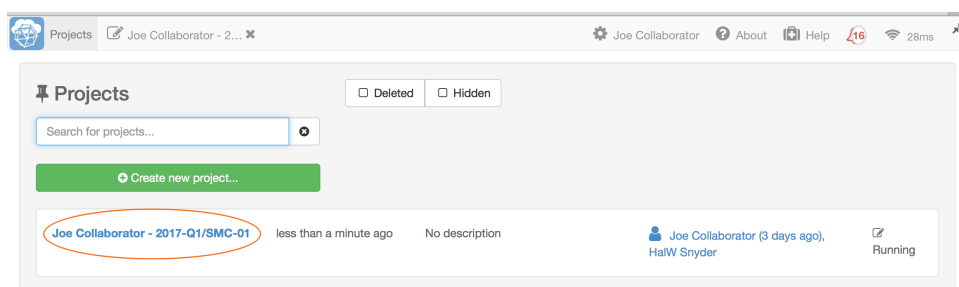

Figure 1: Course project shown in project list

Click the course project in the list. You should see the list of files in the course project, as shown below.

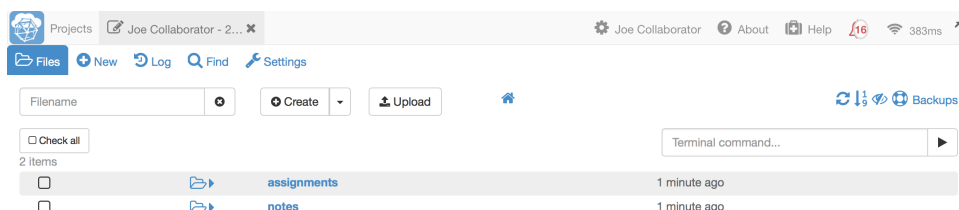

Figure 2: empty project list shown after account is created

Click **notes**, then **01-Welcome**, and then click the file **welcome.tex**. A two-column tab will open showing .tex code on the left and, after a few seconds, formatted preview text on the right, as shown.

(continued on next page)

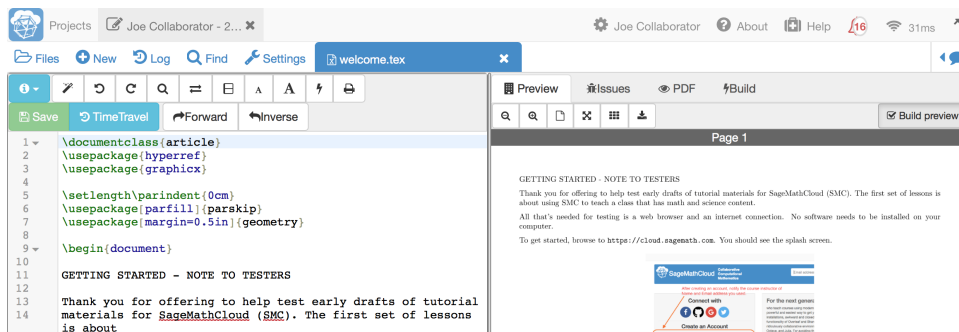

Figure 3: welcome.tex, edit pane on left, preview on right

2 Complete First Course Assignment - edit a file

Finally, go back to the Files view, click on the home directory icon just right of Upload, navigate to assignments/01-Comments, and open user-comments.md. Before you add comments, the file will look like this:

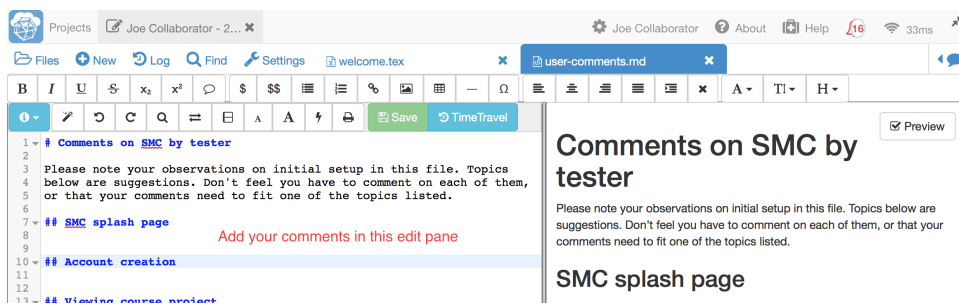

Figure 4: comments.md, edit pane on left, preview on right

Please enter your comments in file user-comments.md. If you don't have any comments, please add a note that you got this far. I will be notified when you update the file.

As ever, if you run into problems, you can email me at hsnyder@sagemath.com.

Thanks again.

Hal Snyder
